[1] Data for some populations and metrics is currently unavailable.

[2] Equity gaps have been determined using both the percentage point gap and proportionality index. Percentage point gap differences are shown here, even if a gap was detected using the proportionality index.

[3] Goals are shown as percentage point differences for DI groups, and as a base increase for the overall rate. Recommended goals are based on the statewide Vision for Success. If no VFS goal aligns with the metric, the goal column will read "TBD."
